

SPAIN

TARGET ADEQUACY:

1.1. 2030 Non-ETS GHG targets	8.7
1.2. National 2030 GHG target	1.0
1.3. 2030 Renewable Energy target	8.3
1.4. 2030 Energy Efficiency targets	0.0
1.5. National 2050 target	3.1

PROCESS QUALITY:

3.1. Effective stakeholder inputs	0.0
3.2. Compliance	0.6

MISSING SCORE
47.6%

POLICY DETAILS:

2.1. Policies and Measures (PAMs) for achieving non-ETS GHG targets	7.1
2.2. Policies and Measures (PAMs) for achieving RES targets	8.6
2.3. Policies and Measures (PAMs) for achieving EE targets	9.4
2.4. Coal use	0.0
2.5. Phase out of fossil fuel subsidies	0.8
2.6.1. Investment data	2.0
2.6.2. Finance measures	2.7

- ✓ The plan makes strong reference to the Paris Agreement with its aim to reach net zero emissions by 2050, although its total greenhouse gas (GHG) emissions target for 2030 is inconsistent with the long-term target.
- ✓ Second most ambitious 2030 non-ETS emissions target in this ranking with -38%.
- ✓ The draft plan provides good details on existing and planned policies and measures (PAMs) on energy efficiency, renewables and GHG emissions.
- ✓ Explicit and detailed description of fossil fuel subsidies, yet no phase-out schedule is provided.
- ✗ The draft mentions the possibility of applying the LULUCF flexibility mechanism, but is unclear if its use is actually envisaged.
- ✗ Very low on the process quality ranking. The NECP was submitted late, the consultations not held early enough to be taken into account, and some important sections are missing like on regional cooperation.

This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
