

CZECH REPUBLIC

TARGET ADEQUACY:

1.1. 2030 Non-ETS GHG targets	1.5
1.2. National 2030 GHG target	1.0
1.3. 2030 Renewable Energy target	0.0
1.4. 2030 Energy Efficiency targets	0.0
1.5. National 2050 target	2.4

PROCESS QUALITY:

3.1. Effective stakeholder inputs	5.6
3.2. Compliance	0.3

MISSING SCORE
71.0%

POLICY DETAILS:

2.1. Policies and Measures (PAMs) for achieving non-ETS GHG targets	1.9
2.2. Policies and Measures (PAMs) for achieving RES targets	8.3
2.3. Policies and Measures (PAMs) for achieving EE targets	4.4
2.4. Coal use	0.0
2.5. Phase out of fossil fuel subsidies	0.8
2.6.1. Investment data	0.0
2.6.2. Finance measures	2.7

- ✓ The draft NECP provides economy-wide greenhouse gas (GHG) emissions targets for 2030 and 2050. It includes explicit mention of the national long-term strategy and the need for coherence between the 2030 NECP and long-term planning to 2050.
- ✓ It contains good detail on existing and planned policies and measures for renewables.
- ✓ Several stakeholder consultations were undertaken.
- ✗ The plan shows low targets for non-ETS emissions, renewables and energy efficiency.
- ✗ It does not include information on phasing out coal or fossil fuel subsidies.
- ✗ Limited information is available about the required investments up to 2030.

This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
