

# NECP NATIONAL SCORECARD

# LATVIA

## TARGET ADEQUACY:

8.9/45

1.1.	2030 Non-ETS GHG targets	1.5
1.2.	National 2030 GHG target	1.0
1.3.	2030 Renewable Energy target	0.0
1.4.	2030 Energy Efficiency targets	2.8
1.5.	National 2050 target	3.6

## PROCESS QUALITY:

7.8/10

3.1.	Effective stakeholder inputs	5.6
3.2.	Compliance	2.2

MISSING SCORE 64.7%

## POLICY DETAILS:

18.6/45

2.1.	Policies and Measures (PAMs) for achieving non-ETS GHG targets	2.3
2.2.	Policies and Measures (PAMs) for achieving RES targets	3.5
2.3.	Policies and Measures (PAMs) for achieving EE targets	2.8
2.4.	Coal use	5.0
2.5.	Phase out of fossil fuel subsidies	0.4
2.6.1.	Investment data	2.0
2.6.2.	Finance measures	2.7

- ✓ Latvia has launched a consultation process open to stakeholders including social partners, and engagement of civil society.
- ✓ The plan contains detailed information on existing and planned policies as well as on investment needs and financing measures. Some information on finance for specific sectors.
- ✓ Latvia has a good overall 2030 greenhouse gas (GHG) emissions target of -55% (vs 1990).
- ✗ Unfortunately this overall target does not convert to higher than a compliance target for the non-ETS GHG emissions (-6%), arguing that it will set a higher target only in 2020 after the adoption of the EC implementing act.
- ✗ Gives only general information on energy subsidies but not on fossil fuels, nor on the policies to drive phase-out.

This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
