

# LITHUANIA

## TARGET ADEQUACY:

**5.4/45**

1.1.	2030 Non-ETS GHG targets	1.5
1.2.	National 2030 GHG target	1.0
1.3.	2030 Renewable Energy target	0.0
1.4.	2030 Energy Efficiency targets	0.0
1.5.	National 2050 target	2.9

## PROCESS QUALITY:

**1.9/10**

3.1.	Effective stakeholder inputs	0.0
3.2.	Compliance	1.9

## POLICY DETAILS:

**19.0/45**

2.1.	Policies and Measures (PAMs) for achieving non-ETS GHG targets	3.2
2.2.	Policies and Measures (PAMs) for achieving RES targets	4.2
2.3.	Policies and Measures (PAMs) for achieving EE targets	4.2
2.4.	Coal use	5.0
2.5.	Phase out of fossil fuel subsidies	0.8
2.6.1.	Investment data	-1.0
2.6.2.	Finance measures	2.7

- ✓ Lithuania is among the top three countries on ambition. It aims at 45% renewables target and wants to achieve it by promoting wind energy, prosumers and biomass for efficient cogeneration.
- ✓ The draft NECP includes economy-wide 2030 and 2050 greenhouse gas emissions targets.
- ✗ There is no information about Lithuania's planned policies and measures to deliver its targets.
- ✗ The draft plan does not provide information about the required investments up to 2030.
- ✗ No consultation process undertaken for the draft plan; the plan contains only a promise of future involvement.

This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
