- ✓ The draft NECP includes information on Poland's investment needs for some specific sectors.
- ✓ It provides projections for existing and planned measures aimed at non-ETS emissions, renewables and energy efficiency.
- ✗ The plan shows low ambition on its non-ETS emissions, renewables and energy efficiency targets.
- ✗ It does not include an economy-wide 2030 GHG target and it has no proper inclusion of the 2050 dimension.
- ✗ Limited information is available in the plan on planned policies and measures and on financing measures.
- ✗ The plan anticipates new coal power investments and the use of Climate Action Regulation flexibilities for the non-ETS target.
- ✗ No consultation process was undertaken for the draft plan.

This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
