This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
