

ROMANIA

TARGET ADEQUACY:

4.1/45

1.1. 2030 Non-ETS GHG targets	1.5
1.2. National 2030 GHG target	1.0
1.3. 2030 Renewable Energy target	0.0
1.4. 2030 Energy Efficiency targets	0.0
1.5. National 2050 target	1.6

PROCESS QUALITY:

0.3/10

3.1. Effective stakeholder inputs	-1.9
3.2. Compliance	2.2

POLICY DETAILS:

16.9/45

2.1. Policies and Measures (PAMs) for achieving non-ETS GHG targets	3.0
2.2. Policies and Measures (PAMs) for achieving RES targets	4.2
2.3. Policies and Measures (PAMs) for achieving EE targets	2.5
2.4. Coal use	0.0
2.5. Phase out of fossil fuel subsidies	1.6
2.6.1. Investment data	3.0
2.6.2. Finance measures	2.7

- ✓ The NECP contains detailed information on financing measures for policies and measures, although it could be further detailed for some policies.
- ✓ The NECP draft provides a description of energy subsidies, including details on existing fossil fuels subsidies, and sets out a phase-out schedule for some of these.
- ✗ The existing policies and measures of Romania are not enough to meet targets for renewables and non-ETS sector (GHG) emissions, though policies and measures planned to come in to force should make up the gap. However, the measures are described in very limited details.
- ✗ Public consultations were initiated but only for a select group of individuals.
- ✗ There is no information about coal use or potential coal phase-out schedule.
- ✗ There is no information to verify if biomass use is truly sustainable.

This scorecard is the outcome of a ranking exercise of the draft National Energy and Climate Plans (NECPs) of the 28 EU Member States. It is based on the information provided directly in the draft NECPs.

The underlying assessment focuses on three core dimensions: the adequacy of the communicated climate and energy targets, the detail of the policy descriptions, and the quality of the NECP drafting process.

It is not a full impact assessment and does not evaluate the likely effectiveness of the presented existing or additional policies or the accuracy of the information provided.

For more information on the analysis carried out please see the report "Planning for Net Zero: Assessing the draft National Energy and Climate Plans", May 2019.
