1. Our role and Strategy

The European Climate Foundation (ECF) was established in The Hague in early 2008 as a ‘foundation of foundations’ to collaborate in ensuring Europe’s transformation to a lowcarbon economy. It was established as a major philanthropic initiative to promote climate and energy policies that greatly reduce Europe’s greenhouse gas (GHG) emissions and to help Europe play an even stronger international leadership role to mitigate climate change. We aim to be the smartest place in Europe for funding climate change mitigation strategies, by identifying the opportunities for intervention – the ‘sweet spots’ where philanthropic investment can make a real difference.

   b. and to educate and raise awareness among the general public regarding the topics described in sub-paragraph “a” above and regarding any related topics, all in the broadest sense.

2. The ECF aims to realise its objectives by raising funds and accepting donations, and subsequently by organising programmes and re-granting its financial means to achieve its objectives.

7. Accounting principles

The ECF’s financial statements have been prepared in accordance with the guidelines for annual reporting 650 “Fundraising institutes” of the Dutch Accounting Standard Board. Donations and costs are attributed to the year to which they relate. Donations are only included when realized before balance sheet date. Losses and risks originating before the end of financial year are taken into account, if they have become known before preparation of the financial statements.
